NEXUS
UNIVERSITY

WHAT WILL YOU LEARN IN THIS PROGRAM?

Nexus University's Master of Business Administration is an intensive graduate program that educates students in theories and practices of the modern business world. The MBA program fosters independent learning and enables students to contribute intellectually to the business profession. MBA students have the option to select one of four advanced areas of study, and these are:

DESIGN THINKING FOR INNOVATION

In the Design Thinking for Innovation specialization, students acquire practical and theoretical knowledge of people-centered innovation processes. The people-focused Design Thinking methodology supports rethinking problems and experimentation in order to create efficient and high-impact solutions.

STRATEGIC AGILITY

In the Strategic Agility specialization, students develop the ability to identify shifts both within an organization and in the external business environment. They also learn tools to assimilate the constant dynamism of the marketplace and its challenges. With an agile, pro-change mindset, students learn the communication skills needed to deliver out-of-the-box solutions to unique enterprise problems.

BUSINESS ANALYTICS

In the Business Analytics Advanced Area, students acquire a strong understanding of the basic concepts of business analytics. Students will be exposed to a comprehensive overview of the field of business analytics, including data mining, statistical modeling, media analytics and more.

GLOBAL BUSINESS

In the Global Business Advanced Area, students acquire a strong understanding of the basic concepts of global business. They learn about both the theory and practical application of international manufacturing and trade, as well as how to create synergy between marketing and business strategies.

WHAT CAN YOU DO WITH AN MBA?

An MBA has often been called the “golden ticket” because it commands respect across the business world and equips graduates with diverse skills that they can use in any number of industries. Students and professionals who earn an MBA are on a path to a rewarding and dynamic career, and where that path takes you largely depends on the concentration and occupation that you’re interested in.

People who left positions with salaries around \$50,000 to start a full-time MBA program saw an 80% increase in their salaries upon graduation.¹

The median annual base starting salary U.S. employers offered new MBA hires in 2019 was \$115,000.²

In a survey of 21,000 MBA holders, close to 95% considered the cost of their degree to be a good investment – even those who graduated during a recession.³

MBA QUICK FACTS⁴

- More master’s degrees are awarded in business than in any other field.
- Workers with an MBA command higher salaries in nearly every job compared with those only holding a Bachelor’s degree.
- MBAs in the consulting sector are paid, on average, over \$130,600 annually.
- An MBA is an internationally recognized qualification that can help you get a job almost anywhere in the world.
- According to the Bureau of Labor Statistics, the demand for marketing MBAs is expected to increase by 10% from 2016 to 2026 – faster than the national average for all occupations.
